SMOK

**Battery
operated
Fire Smoke
Analyser,
Detector
cum Alarm**

Introducing the standalone integrated Smoke Analyser Detector cum Alarm - '**SMOK**' for quick and simple installation to analyse and detect fire smoke and raise an alarm through a sounder/buzzer with flash alarm. It is an independent fixture on the ceiling in fire risk areas of small establishments, without any electricity wiring or a fire alarm control panel and other costly fixtures.

SMOK looks like any industry standard smoke detector, which is engineered and developed to meet the fire safety requirements of establishments where a full-fledged fire detection and alarm system is not necessary or feasible. Installation is instant and can be fixed wherever required on the ceiling or false ceiling.

- **SMOK** does not require an alarm control panel or an external power source to function. It integrates the **Sensor, Analyser, Sounder/Buzzer and electronic Processor** all in one compact unit. This makes the industry grade safety alarm device an independently functioning security system, optimized for protection of small sized properties like residences, apartments, temporary structures, garages, shops, offices, showrooms, stores, warehouses, hotels, restaurants, hospitals, nursing homes, diagnostic centers, stores and other small institutions.
- Low unit cost with durable investment to secure life and asset safety.
- Easy to install by the electrician and ceiling mountable.

'**SMOK**' is engineered with sensors that offer a wide smoke sensitivity range to detect a fire. It delivers high performance standards and prevents false alarms.

Technical Specifications:

- Dimension 100x42mm and weight: 80gm and with base: 100x54mm and Weight: 120gm
- Dual bi-colour LED indication for 360 degree viewing angle
- Operates with two numbers AA 1.5V batteries with long battery life
- SMOK has a long shelf life and comes with one year warranty against any manufacturing defects
- Sleek, compact and elegant design does not require complex wiring
- **Secure your Fire risk and Life safety, today!!**
